Problem

 Communication error with the external tax system (VERTEX_MS0018)

Why this happens ?

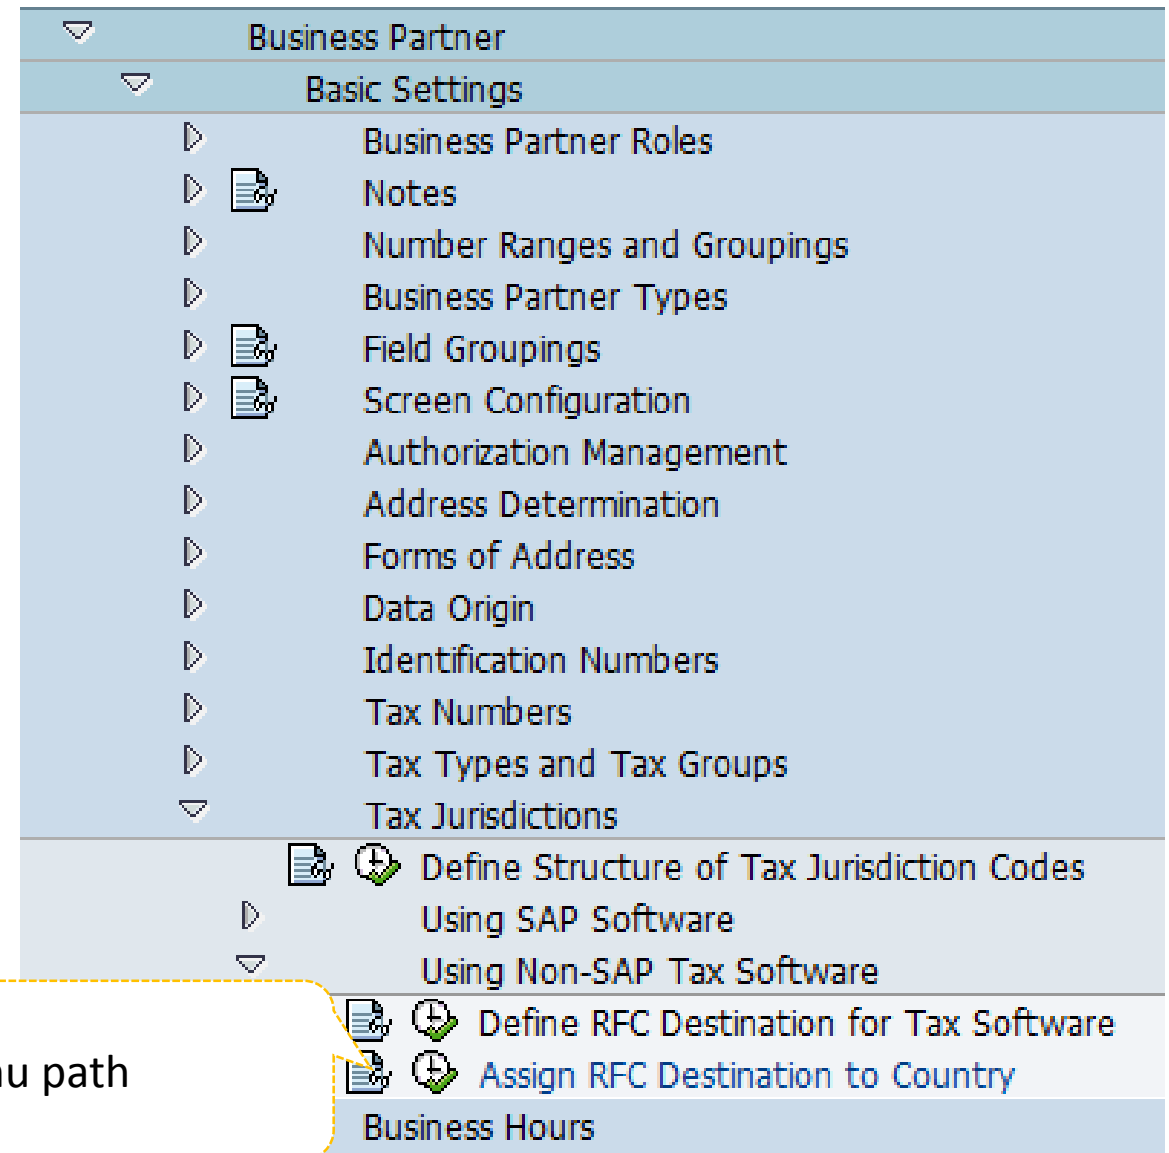

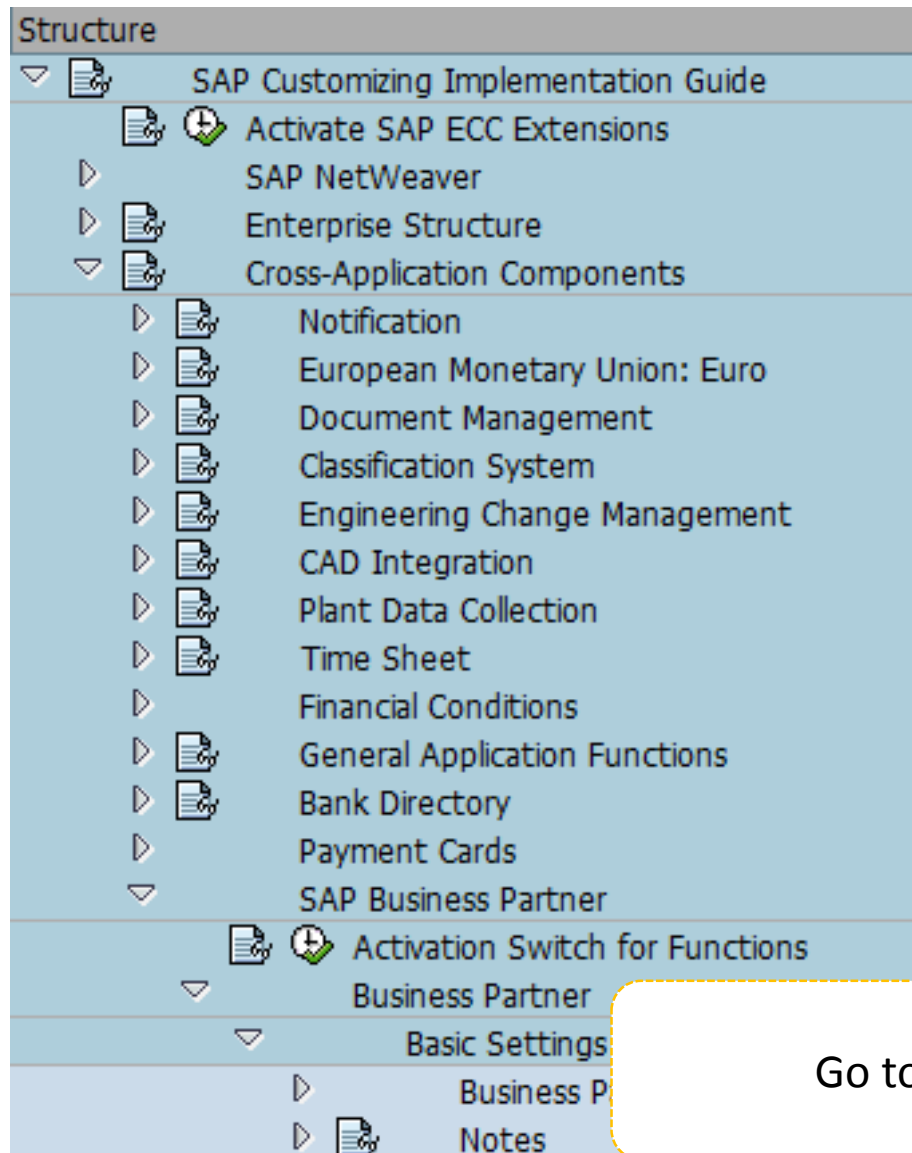

Because, SAP is trying to hook up with external tax vendor to determine Jurisdiction code.
But, it is not able to reach the external tax vendor. (eg., vertex)

Solution

If you are trying to just practice SAP in an IDES system, you can turn this integration off using 2 methods.

Method 1 – De-activate the link

Go to this menu path

Change View "TTXD: View of External System": Overview
