

## CONFIGURING FIORI LOGON SCREEN IN FES

### Configure the SAP Fiori Launchpad Login Screen (FES)

Configure the SAP FIORI Launchpad Login Screen

1. TCode: SICF → Service `/sap/bc/ui5_ui5/ui2/ushell`
2. Double click on **ushell**
3. Go to tab **Error Pages**
4. Select the radiobutton **System Logon**
5. Click on **Configuration** button
6. Maintain ABAP Class, Protocol, System Logon Setting as shown in the screenshot

The screenshot displays the SAP FES configuration interface for the service `/sap/bc/ui5_ui5/ui2/ushell`. The **Error Pages** tab is selected, and the **System Logon** radio button is chosen. The **Configuration** button is highlighted with a red arrow. The right-hand pane shows the **System Logon Settings** for the **Default** client, with the **ABAP Class** set to `/UI2/CL_SRA_LOGIN` (highlighted with a red box). Other settings include **Language** set to **English** and **Protocol** set to **Do Not Switch**. The **Actions During Logon** section includes options like **Do Not Display Warnings** and **Check for Multiple Logon**. The **Logon Layout and Procedure** section shows **SAP Implementation** and **Custom Implementation** options.
