Below is the code snipped with Case and Cast Code

```
@AbapCatalog.sqlViewName: 'ZISALESHD'
@AbapCatalog.compiler.compareFilter: true
@AbapCatalog.preserveKey: true
@AccessControl.authorizationCheck: #CHECK
@EndUserText.label: 'Sales order header'
define view ZI_SalesHdr1
  as select from vbak
  association [0..*] to ZI_SalesOrdItem2 as _SalesItem on $projection.SalesOrder
= _SalesItem.SalesOrder
{

  key vbeln as SalesOrder,
      cast(erdat as abap.char(8)) as CreatedOn,
      case vbtyp
      when 'C' then 'Order'
      when 'A' then 'Inquiry'
      else 'Other doc types'
      end  as DocCategory,
      auart as OrderType,
      augru as OrderReason,
      netwr as NetValue,
      waerk as DocCurrency,
      _SalesItem
}
```
